

AMENDMENTS IN THE SPECIFICATION

The following is a marked-up version of the specification with the language that is underlined ("____") being added and the language that contains strikethrough ("~~—~~") being deleted:

(Beginning page 2, paragraph 4)

SUMMARY

~~The present disclosure provides systems and methods for compiling information obtained by combinatorial searching.~~

~~Briefly described, some embodiments, among others, include a search for sensitive information. Once a result of the search has been obtained, a score is assigned to the obtained result in accordance with a predefined criterion.~~

Included are embodiments for searching sensitive information. At least one embodiment of a method includes searching for a first piece of sensitive information, searching for a second piece of sensitive information, and combining a score associated with the search for the first piece of sensitive information and a score associated with the search for the second piece of sensitive information.

Other systems, devices, methods, features, and advantages will be or become apparent to one with skill in the art upon examination of the following drawings and detailed description. It is intended that all such additional systems, methods, features, and advantages be included within this description, and be within the scope of the present disclosure.
